**smart, simple, secure scanning**

# GoScan® – smart, simple, secure scanning

*"You just push the scan button, the scanner produces an image, and then it is uploaded directly to the active folder ..."*

*Virtual Office News*

## GoScan® is simple

Technology has to be easy to be accepted. GoScan's simple interface is pre-programmed with all required details. This allows users to scan in one step and eliminates support headaches for an IT department. GoScan's ease-of-use eliminates user errors, reduces training time and increases productivity.

- Initial configuration in less than 5 minutes
- Learn to use in less than 1 minute
- Just enter the number of pages and press GO

## GoScan® is smart

Technology has to be smart to be worthwhile. GoScan is smart because it can recognize bar coded sheets within a large stack of documents and then separate the documents into smaller files. This provides fast, accurate automatic filing of documents without any human intervention.

- Supports over a dozen common barcodes
- Allows for multiple barcodes on a single separator sheet
- Separator sheet setup in less than 1 minute

## GoScan® is secure

GoScan provides secure transmission of image files from the remote site to the central server to ensure compliance with rules and regulations.

- Supports HTTPS, FTPS and webservice transmission over the internet
- User sign-on option available

*"Imagine the visibility you could gain if you provide software with your own name and logo. GoScan makes this possible."*

*Business Solutions Magazine*
